

The next step I would take is to design the **entire Recruitment Module screen-by-screen**, including the actual sidebar, dashboard, requisition form, vacancy workspace, candidate profile, Kanban pipeline, interview evaluation, approvals, offer screen, analytics and candidate portal — down to buttons, cards, spacing, colours and exact field placement. That would give you a proper **HRMIS Recruitment UI/UX blueprint** your designers/developers can implement rather than just a list of ideas.

Below is the **full HRMIS Staff Recruitment UI/UX blueprint** I would use if we were designing this as a serious modern product from scratch.

The design goal is:

Make complex recruitment feel simple, guided and intelligent.

The system should have the depth of Workday/Oracle/SAP, the friendliness of HiBob/BambooHR, and the workflow speed of Rippling/Greenhouse — but adapted to your own HR processes.

1. PRODUCT STRUCTURE

I would structure the HRMIS like this:

HRMIS

Overview

My Tasks

People

Employees

Positions

Organization Structure

Talent

Recruitment

Performance

Learning

Succession

Workforce

Leave

Attendance

Timesheets

Compensation

Payroll

Benefits

Insights

Analytics

Reports

Administration

Workflows

Templates

Security

Audit Logs

Settings

When the user enters **Recruitment**, they should not see another huge sidebar.

Use a recruitment-level navigation:

Recruitment

Overview

Requisitions

Vacancies

Candidates

Interviews

Offers

Talent Pools

Analytics

2. RECRUITMENT HOME / COMMAND CENTRE

This should be the most useful page in the entire module.

Not just a dashboard.

A **command centre**.

Recruitment	+ New Requisition	
Manage hiring activities, candidates and recruitment processes		
Good morning, Grace 🙌		
Wednesday, 16 September		

Here's what needs your attention today.

|| 4 || 23 || 3 || 2 ||

Approvals	Applications	Interviews	Vacancies closing
-----------	--------------	------------	-------------------

|| Waiting || To Review || Today || Soon ||

YOUR PRIORITIES UPCOMING

⚠ Senior Accountant approval	10:00 Interview
------------------------------	-----------------

Waiting 2 days	Systems Analyst
----------------	-----------------

Review →

		14:30 Interview	
--	--	-----------------	--

• 23 ICT applications unreviewed	HR Officer
----------------------------------	------------

Review applicants →

ACTIVE RECRUITMENTS

Position	Stage	Applicants	Health	Owner
----------	-------	------------	--------	-------

Systems Analyst	Shortlisting	142	 Attention	Grace
-----------------	--------------	-----	---	-------

Accountant	Applications	86	✓ On track	Sarah
------------	--------------	----	------------	-------

HR Officer	Interview	34	✓ On track	Peter
------------	-----------	----	------------	-------

| Procurement Officer Approval - • Waiting Grace |

The important improvement is **priorities before statistics**.

HR should immediately know:

What requires me?

3. DASHBOARD METRICS

The first row can have:

Metric	Example
Active recruitments	12
Open vacancies	18
Applicants	486
Interviews this week	24
Awaiting approval	4
Offers pending	5

But don't stop there.

Add meaningful trends:

Open Vacancies

18

↑ 3 from last month

Or:

Average Time to Fill

34 days

Target: 30 days

↓ Improved by 4 days

4. ATTENTION CENTRE

Create a component called:

Needs Attention

This should automatically surface operational problems.

Example:

Needs Attention	6
-----------------	---

⚠ Procurement Officer requisition

Awaiting Director HR approval for 4 days

Target: 2 days

Review →

⚠ Systems Analyst

63 applications have not been reviewed

Review applications →

⚠ Accountant recruitment

Vacancy closes tomorrow

[View vacancy →](#)

⚠ Interview feedback

3 panel members haven't submitted evaluations

[Send reminder →](#)

This could become one of your system's strongest features.

5. MY TASKS

Separate tasks from notifications.

My Tasks

TODAY

☐ Approve Senior Accountant requisition

Requested by Sarah • Finance

☐ Review Systems Analyst shortlist

23 candidates

☐ Submit interview evaluation

Candidate: John Okello

UPCOMING

☐ Publish Procurement Officer vacancy

Tomorrow

Users should be able to:

Complete

Open

Reassign

Snooze

where permissions allow.

6. NEW STAFF REQUISITION

This screen deserves special attention.

Never create this:

Staff Requisition Form

Position

Department

Grade

Salary

Location

Reason

Number

Employment type

Cost centre

Budget

Replacement

Reports to

Expected start

Description

Requirements

Approvers

...

[52 more fields]

That is painful.

Instead use a stepper.

8. REQUISITION — STEP 2

Staffing details

How many staff are required?

Number Required

[2]

Recruitment Reason

- Fill existing vacancy
- Replace employee
- New position
- Temporary requirement
- Expansion

If replacement:

Employee Being Replaced

[Search employee...]

Reason for Replacement

[Resignation ▼]

If new position:

⚠ This position is not currently part of the approved establishment.

Additional authorization may be required.

Excellent UX means the form changes based on what the user chooses.

9. STAFFING BUDGET

For authorized users:

Staffing Budget

Annual budget allocation UGX 540,000,000

Current committed cost UGX 428,000,000

Estimated recruitment cost UGX 72,000,000

Projected total UGX 500,000,000

✓ Within approved budget

If not:

⚠ Projected staffing cost exceeds the current budget

by UGX 22,000,000.

Additional budget approval will be required.

The system should explain implications before submission.

10. STEP 3 — REQUIREMENTS

Divide requirements into clear blocks.

Role Requirements

Minimum Education

[Bachelor's Degree ▼]

65. DESIGN SYSTEM

I would use a very restrained enterprise visual system.

Colours

Primary Blue #2563EB

Background #F8FAFC

Surface #FFFFFF

Primary Text #111827

Secondary Text #6B7280

Border #E5E7EB

Success #16A34A

Warning #D97706

Danger #DC2626

Information #0284C7

Avoid making the entire system blue.

Blue should indicate:

Primary actions

Selection

Navigation

Links

Active states

66. TYPOGRAPHY

Use:

Inter

Recommended sizing:

Element	Size
Main page title	28px
Section heading	18–20px
Card metric	28–32px
Body	14px
Table text	14px

Labels 13–14px

Supporting text 12–13px

Do not make everything bold.

67. SPACING

Use an 8px design system.

4px

8px

16px

24px

32px

48px

Recommended page:

Sidebar 240px

Top bar 64px

Page padding 32px desktop

Card padding 20–24px

68. CARDS

Use:

Border radius 10–12px

Border 1px #E5E7EB

Background White

Shadow Very subtle

Do not create giant floating cards everywhere.

Some sections can simply use whitespace.

69. BUTTON HIERARCHY

Primary:

[Create Requisition]

Secondary:

[Save Draft]

Tertiary:

Cancel

Danger:

[Reject]

Never put five equally prominent buttons beside each other.

70. STATUS BADGES

Use:

Draft

Pending Approval

Approved

Published

Applications Open

Shortlisting

Interviewing

Selection

Offer

Completed

Cancelled

Colour should reinforce status but never be the only indication.

71. TABLE UX

Every major table should have:

Search

Filter

Saved Views

Column Preferences

Sort

Export

Rows should support:

Single-click preview

Double-click/full open

Selection

Context actions

Don't show 20 columns simultaneously.

Allow users to choose columns.

72. FILTER EXPERIENCE

Use chips.

Candidates

[Search candidate...]

+ Filter

Date Applied

Experience

Qualification

Skills

Source

Recruiter

73. FORM UX

Every form should have inline validation.

Bad:

Submit

ERROR:

Field 6 required.

Good:

Closing Date *

[15 Sep 2026]

⚠ Closing date must be after publication date.

74. AUTOSAVE

For long forms:

Saving...

then:

Saved ✓

If network fails:

You're offline.

Your changes are saved locally and will sync
when your connection returns.

This is especially valuable in our context.

75. EMPTY STATES

Never:

No records found.

Instead:

No candidates yet

Applications will appear here once candidates
begin applying for this vacancy.

[View Vacancy]

76. ERROR STATES

Never:

Error 500

Use:

We couldn't save this requisition.

Your changes are still available.

Try Again

And technical details can be available under:

View Error Details

for support staff.

77. MICROINTERACTIONS

When moving a candidate:

Candidate moved to Interview

Undo

When deleting:

Remove Sarah from shortlist?

Her application will remain in the recruitment history.

Cancel Remove

When approving:

✓ Requisition approved

Director HR has been notified.

These little details determine whether the product feels polished.

78. ACCESSIBILITY

Your design system should support:

Keyboard navigation

Visible focus states

Screen readers

High contrast

Large clickable targets

Proper labels

Responsive font sizes

No colour-only meaning

79. RESPONSIVE DESIGN

Desktop HR administration:

1440px ideal

1280px supported

1024px usable

Candidate experience:

Design first for:

360px

390px

430px

because many candidates will apply from phones.

80. CANDIDATE CAREER PORTAL

Make this completely separate from the internal HR UI.

Organization Logo

 - Decision

No action is currently required from you.

Beautiful, reassuring and transparent.

84. HRMIS HOME AFTER LOGIN

Eventually, Recruitment shouldn't be isolated.

Imagine:

Good morning, Grace 🙌

My Work

4 Approvals

3 Interviews Today

2 Leave Requests

1 Contract Renewal

My Tasks

Recruitment

Review Systems Analyst shortlist

Payroll

Confirm August payroll exception

Performance

Complete quarterly review

Your HRMIS becomes one coherent work platform.

THE SIGNATURE EXPERIENCE

If I were designing this product with you, I would make **five UX concepts** visually distinctive enough that users begin associating them with your HRMIS:

Signature feature	Purpose
Recruitment Journey	Always shows where recruitment currently is

Needs Attention	Surfaces problems automatically
Next Action	Tells users what should happen next
Recruitment Health	Shows whether a process is on track and why
Quick Preview	Lets users inspect records without leaving their work

Those five things alone can make the product feel far more intelligent than a conventional HRMIS.

And I'd use this principle for every future module:

The system should never merely store information. It should help the user understand what has happened, what is happening now, and what needs to happen next.

That philosophy can eventually carry across **Recruitment, Employee Management, Leave, Payroll, Performance, Training, Contracts and Pension** and give the entire HRMIS one consistent product identity.
